He was an awesome teacher. I think that the TA's in the lab could have been more helpful.

I really did enjoy this course this semester, however I do believe that the actual Lecture portion of CS 101 was a little too long because 1 hour and 15 mins is a long time to sit and listen to a lecture.

regular 101 should not be put on the same curve as the 101 E students. They are not the same class. Students in 101E have experience and when the subject matter is very challenging for new cs students, it is still a breeze for students who have experience in cs. That is why the average for the class is a 90

Hands down, Bloomfield was the best professor i've ever had. He really knows his stuff and can answer in class questions quickly with answers that allow everyone to understand the material better. He is flexible with his lectures...molding them to fit the demands of his students. He is also extremely fair in how he grades. If he finds an assignment was too hard then he provides extra assistance to ensure everyone can still complete it. He also really understands how the average student's minds think, therefore he breaks up his lectures witha funny story or joke to get everyone back in on the lecture. His slide were always well prepared and contained important information that made everything so much easier to understand. For a class as large as the CS 101 class is when everyone comes almost every day that says a lot for the professor. The labs were slightly tedious, and seemed almost useless sometimes, but I understand what they were trying to do and thought they did a very nice job with how it was organized.
